## Week 6 Assignment

1. What does OWASP stand for?

---

2. What are the OWASP Top 10?

---

3. Using the OWASP Juice-Shop website we ran in class, determine the password for the user `jim@juice-sh.op`.

---

Some tips to get you started!

a) Download the password list.

```
wget https://raw.githubusercontent.com/kkatayama/cyber_topics/master/passwords.txt
```

b) Start the Docker Service.

```
systemctl start docker
```

c) Open OWASP Zed Attack Proxy

```
owasp-zap
```

**d) Open Firefox.**

firefox

**e) Navigate to the login page.**

<https://kali:3000/#/login>

If you do not see a place to enter a `Email` and `Password` then you may still be logged in. Click `Account` > `Log Out` to log out.

**f) Use the password list you just downloaded to `fuzz` the password**

If you are having trouble completing this task, you may find the `md5 hash` password for `Jim's` account in the lecture notes...
